

HOMEOPATHY FOR *Gardens*

LEARN CONNECT THRIVE!

national center for homeopathy

Homeopathy benefits people, animals, and even PLANTS! Homeopathic remedies strengthen plants so they can better withstand weather, insects, and disease. Applying homeopathy to soil infuses life into dead, depleted flower beds and gardens, helps plants produce more flowers, and increases fruit yields. The result is sustainable, cost-effective, and healthy food production.

Keep the Soil Healthy

Balance the mineral health of your soil using remedies:

Borax, Calcarea carbonica, Calcarea sulphurica, Ferrum phosphoricum, Magnesium phosphoricum, Phosphorus

Maintain Plant Health

Aconite - sudden wilting or drying out; after storms, hot days, and cold nights

Arnica - trauma from pruning or transplanting; bruising of roots

Calendula - wounds from pruning, lacerations, or broken bark

Carbo veg - near-death after transplant or loss of fluid

China - exhausted and drooping from overbearing fruit

Phosphorus - Stunted growth; reduced flower and fruit production

Silicea - strengthens all plants; give only one dose for a healthy start

Help Damage from Weather

Drought - *Silicea, Dulcamara, Sulphur*

Frost - *Aconite, Borax*

Heat - *Sol, Arsenicum album, Belladonna, Cantharis*

Waterlog - *Natrum sulphuricum*

Keep Pests & Problems Away

Use homeopathy, not pesticides

Aphids - *Coccinella, Cimicifuga, Sulphur*

Snails and Slugs - *Helix tosta*

Spider mites - *Coccinella, Petroleum, Sulphur*

Fungus - *Sulphur*

To use homeopathy for plants, dissolve 2-3 remedy pellets in a spray bottle filled with spring water. Spray the plant directly 1-2 times. For soil deficiency, spray around the base of plants or directly on soil if not yet planted. For frequency and duration, refer to *Homeopathy Today - Special Digital Edition: Gardening and Farming*.
